

Validation Training for Physicians for all medical professionals

Why you should take this course:

- Reach better patient outcomes
- Practice concrete tools that enhance communication with older adults living with cognitive decline
- Feel more connection with the patient
- Have concrete tools that help communication
- Work more effectively with this population
- Gain more satisfaction

What you will learn:

- Gain deeper understanding into the world of the disoriented older adult
- Recognize meaning behind the behavior
- Empathize with their emotions
- Practice verbal and non-verbal techniques that improve communication
- Build competence in managing angry or silent patients.
- Optimize communication and interactions using key Validation principles

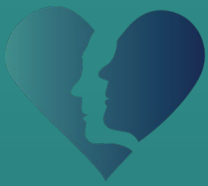

5 Lessons: all online

- **Each lesson should take no more than 1 hour every 2 weeks**
- **Videos, quizzes and case studies are used asynchronously;**
- **Each Lesson ends with a 30-minute zoom webinar led by a certified Validation Teacher. See the dates on the following page.**
